PADI Drysuit Specialty Course

February 7th & 9th

Interested in staying warm & dry? Using a drysuit is the answer! These suits seal the water out and keep you comfortable, even in cold water. Often times, colder weather brings better visibility and becoming a drysuit diver allows you to expand your boundaries, dive more places, and extend your scuba season. For more information and pricing, please contact the Dive Center at (206) 824-4100 or info@tlsea.com

PADI Peak Performance Buoyancy Course

February 7th & 9th

When observing sea life, controlled buoyancy prevents a diver from disturbing their surroundings by keeping them off the bottom. This course is like “underwater yoga”; it teaches mental visualization and breath control. These concepts, coupled with proper weighting and trim, enable the diver to move effortlessly through the water while conserving their air, as well as the environment. Proper buoyancy control is a key component for proficiency in U/W Photography, U/W Videography and Drift Diving. For more information and pricing, please contact the Dive Center at (206) 824-4100 or
