

TL SEA DIVING

Galapagos Archepelago Darwin, Wolf, Central Islands

Humboldt Explorer

Dive Famous Darwin and Wolf Islands

The enchanted islands of the Galapagos Archipelago remain a distant dream for most. The reality of high-voltage diving in an area visited only by a very lucky few provides for a truly unique liveaboard diving vacation. Dive conditions are challenging. The rewards, however, are great. Who hasn't imagined being in a land filled with creatures that time seems to have forgotten? Shoals of Galapagos sharks, schooling scalloped hammerheads, roaming whale sharks, excitable dolphins, and myriad other pelagics frequent these waters. You'll return home with a new appreciation for nature's bounty and fond memories of admiring the fishing prowess of blue-footed boobies, the unique behaviors of the large schooling marine life and the abundance of species found on land and underwater

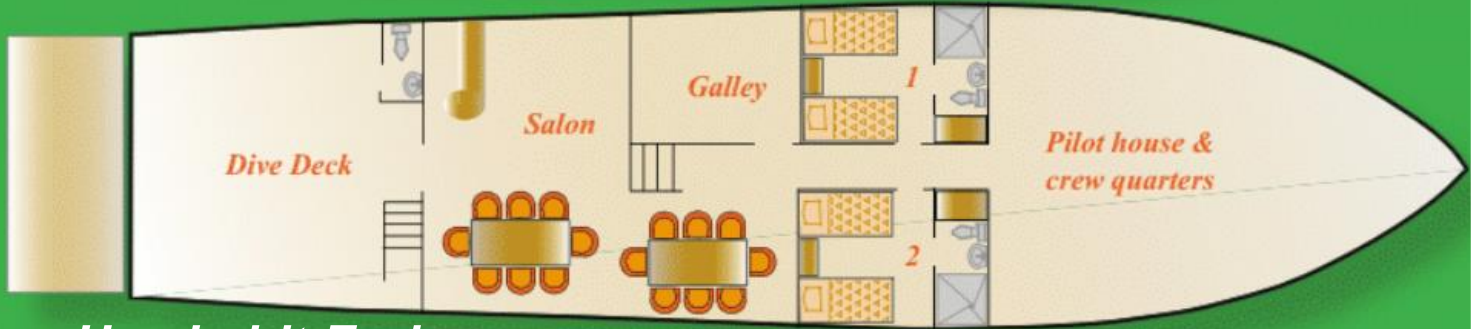

June 29th-July 6th, 2026

\$6,495.00 – Non-Refundable Deposit of \$1095.00
